***DETAILED ACTION***

In response to election restriction requirement, applicant elects to prosecute claims 20-23 in correspondence dated 11/28/2007.

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Lawrence Ashery on 1 February 2008.

The application has been amended as follows:

Cancel claims 16-19, 24-26

***Allowable Subject Matter***

1. Claims 20-23 allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art teaches an imaging system with a pre-processor or signal processor which reduces an amount of data by a thinning out device and also a memory controller which writes signals interpolated by an interpolation device. However, the prior art fails to teach the above in combination with the thinning out device outputting a first control signal and the memory controller writes only a digital signal among a plurality of digital signals interpolated when the first control signal is at a predetermined level.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Suzuki (US 6697127) teaches a gamma correction circuit with a data group generator.

Horiuchi (US 7298402) teaches an image pickup apparatus where pre-photographing is performed.

Koyanagi et al. (US 5880782) teaches a video camera system and method for automatically control the exposure.

Hara et al. (US 7170633) teaches an imaging apparatus where a scene is judged with an image data outputted from an area sensor.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Amy Hsu whose telephone number is 571-270-3012. The examiner can normally be reached on M-F 8am-5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lin Ye can be reached on 571-272-7372. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
